

# Do you know that poor inventory management can result in revenue loss, cost increase, and directly impact on profit?

Is your company experiencing any of the following issues of inventory management?

- ✓ Insufficient stock of materials for production or insufficient stock of goods for delivery slows your business down.
- ✓ Goods/Materials that are broken, worn out, or expired during long period in stock must be destroyed due to their unqualified condition.
- ✓ Overstocking has a negative impact on working capital management.

With those aspects, good inventory management is one of key factors contributing to any company's success.
