

FEATURED E-LEARNING COURSE

RAISING EMPLOYEE AWARENESS OF COMPLIANCE

Nowadays, businesses are increasingly focusing on building a **compliance culture**, as even a minor act of **negligence** can lead to serious consequences for both individuals and organizations. The gap in compliance awareness between Vietnamese employees and international standards, particularly in Japan, has created an urgent need for companies to train and raise compliance awareness among their workforce. This is not only a foundation for sustainable development but also a key factor in building a professional image and credibility in the market.

To support businesses in enhancing compliance awareness among employees, Aimnext Vietnam introduces the online **E-Learning course "Enhancing Compliance Awareness"**, which helps companies:

- Equip employees with a proper understanding of the importance of compliance.
- Help employees recognize the consequences of even the smallest violations and develop professional working habits.
- Build a safe, respectful working environment and minimize risks for the entire organization.

 **Saving training cost and time**

 **Managing and tracking learning progress easily**

 **Increasing learning absorption quickly**

PROGRAM CONTENT
