Protect yourself and your business!

ENHANCE AWARENESS OF INFORMATION SECURITY

Currently, businesses are facing increasingly complex challenges related to information security. Not only large corporations, but also small and medium-sized enterprises can become targets of cyberattacks. Moreover, most cyberattacks originate from unintentional actions by employees themselves. Therefore, raising information security awareness across all employees is no longer an option, but has become an essential requirement for every organization.

To help organizations strengthen their information security posture, Aimnext Vietnam has designed the online E-learning course **"Enhancing Awareness of Information Sercurity" for employees**:

- Provides employees with fundamental knowledge of information security.
- Helps staff recognize common threats and build safe working habits in daily operations.

Especially, this online course will help enterprises improve efficiency in cybersecurity management.

✓ **Saving training cost and time**

✓ **Managing and tracking learning progress easily**

✓ **Increasing learning absorption quickly**

PROGRAM CONTENT

Experience the course now! >>> **Link**

60 MIN
